## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-7 drawn to an etalon, classified in class 359, subclass 586.
  - II. Claims 8-9, drawn to a wavelength locker with detector, classified in class 359, subclass 238.
  - III. Claims 10-11, drawn to an optical amplifier with a gain equalizer, classified in class 359, subclass 337.1.
  - IV. Claims 12 -13, drawn to an optical amplifier with a modulator, classified in class 359, subclass 346.
2. Inventions I-IV are related as subcombinations disclosed as usable together in combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, all of the inventions have separate utility such as in a combination that does not include the particulars as identified in the other groups. See MPEP §806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
